| <input type="checkbox"/> Cancer (type): _____                 | <input type="checkbox"/> Thyroid disease   |
|   | <input type="checkbox"/> Arthritis   |

I understand that if I begin testosterone replacement with any testosterone treatment, including testosterone pellets, that I will produce less testosterone from my testicles and if I stop replacement, I may experience a temporary decrease in my testosterone production. I am also aware that testosterone will also decrease my sperm production. This should return to normal 3 months after the pellet or injectable testosterone is out of my system. Testosterone Pellets should be completely out of your system in 12 months.

By beginning treatment, I accept all the risks of therapy stated herein and future risks that might be reported. I understand that higher than normal physiologic levels may be reached to create the necessary hormonal balance.
